

MESSAGE FROM THE FOUNDERS

Our country Bharat is moving towards a new role in the world as a leader in different fields. Manavodaya has been a proud partner in this process having trained several thousand professionals across the country.

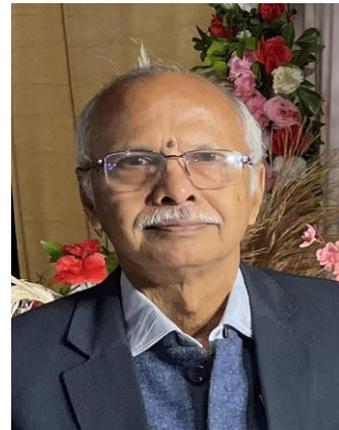

We bring this excellence in knowledge and skills to students of Manavodaya College keen to become entrepreneurs in the expanding business ecosystem with the additional practical understanding and practice of leadership. The undergraduate course Bachelors of Business Administration (BBA) affiliated to the Lucknow University shall prepare the students for a degree from the University while developing entrepreneurship skills to start their own business.

The college is, therefore, keen to enroll students who wish to develop practical skills in the subject to start their own business or to be of value to companies arriving for placement. I also wish to state that Manavodaya College is a place to enhance extra-curricular skills in games, art, music, language, computing and communication skills. We would also be keen to share expertise in Yoga, personality development and leadership in the new challenging work environment. This is a part of an ongoing tradition at Manavodaya for which learning sessions and programs are held regularly.

We welcome the youth to a part of the Manavodaya family to develop their career for joyful living while contributing towards Viksit Bharat.
